

Document Ninja: a NinjaSuite App

Document Ninja is a web-based app that converts documents from a large variety of common formats into HTML5 and adds a simple SCORM wrapper for page completion tracking.

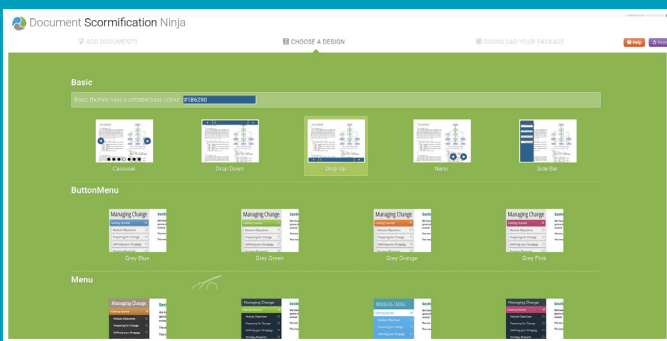

How does it work?

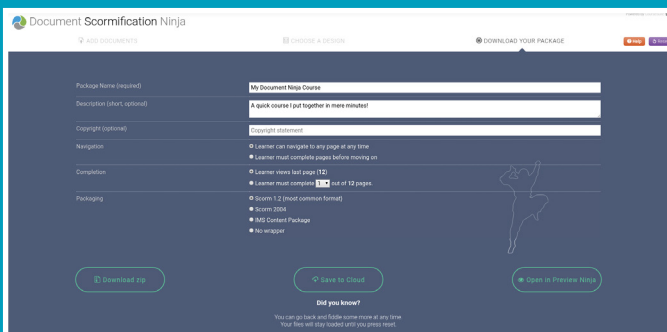

Our Document Ninja is an in-browser course wizard. With it you can take your existing content and convert it to modern, industry standard HTML5 and give it a SCORM wrapper, making it ready to upload into your LMS platform. All in a matter of minutes and all by dragging links or files onto your browser.

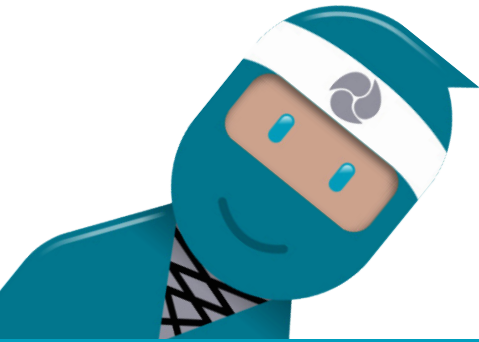

The Document Ninja is designed to be simple to use and fast to interact with. Use your preferred editor - Word, PDF, streaming media, images and many other formats - to create your content. Drag or upload multiple content types into this app and we'll then convert it to HTML5, add simple quizzes if wanted, customise your look and feel. Test it in our free Preview Ninja or export to SCORM, ready to be played back on most modern devices.

This app was born from one question: *Why isn't there a simple app to allow me to just add different media and export it to SCORM?* So we built it. No special development skills are required.

Try it today:
<https://www.coursesuite.ninja>

- Fast, secure purchasing via FastSpring
- Your subscription will be charged monthly until cancelled
- Try before you buy - first 7 days are free!
- All apps are desktop browser based and require Firefox, Safari, Chrome, Opera or Vivaldi

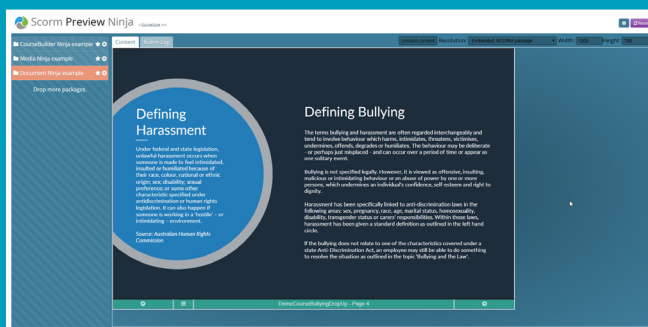

Standalone

DOCUMENT NINJA

- Simple to use
- Convert multiple file types
- Insert simple quizzes
- HTML5 compliant output
- Streaming video support
- Load or combine Doc Ninja packages
- SCORM / IMS CP support
- Design templates

PREVIEW NINJA

Automatically test your settings or output content before testing elsewhere:

Preview multiple versions of your output content before deciding.

Bundled

POPULAR APPS BUNDLE

Includes our most popular NinjaSuite apps:

- Media Ninja
- Document Ninja
- CourseBuilder Ninja
- Preview Ninja

New apps will be automatically added to your subscription once released.

API ACCESS

- Create authentication tokens for accessing and launching apps
- Access all apps and features, including future releases
- Multiple concurrent user licensing
- Volume Licensing option (multiple accounts)
- Add custom templates, white-label apps
- Custom billing options - contact us for information

About Us

We are an innovative eLearning development company focused on developing a suite of great online web apps that allow rapid creation of interactive and intuitive HTML5-based SCORM courses. We also release Open Source plugins for Moodle, and produce online course content.
